DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/8/2007 has been entered.

Allowable Subject Matter

Claims 1, 18 and 22 – 32 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's amendment filed on 6/8/2007 overcomes the 35 USC 112 rejection of claim 18, 35 USC 101 rejection of claim 18 and 35 USC 102 rejection of claims 1 and 18.

The Examiner finds Applicant's argument (filed on 6/8/2007) concerning the amended claims and the prior art or record persuasive. Tummalapalli does not teach the combination of claimed elements including: "... collection a plurality of measurements pertaining to a plurality of service offerings of the SLMS ... constructing a geospatial cube from the collected measurements ... a first dimension of the geospatial cube comprises a first collection of planes, each of the planes in the first collection representing ... a service offering metric computed from the measurements collected ... a second dimension of the geospatial cube comprises a second collection of planes, each of the planes in the second collection representing ... each of the plurality of times at which the measurements were collected ... a third dimension of the geospatial cube comprises a third collection of planes, each of the planes in the third collection representing ... the service offering metric

Art Unit: 2166

computed from the measurements collected ..." Tummalapalli discloses a multidimensional database technology applied to systems management but does not teach that the collected data (measurements pertaining to service offerings of SLMS, wherein a service offering comprises collaborations, a collaboration comprises key process indicators, a key process indicator represents at least one of the processes of the SLMS) are used to construct a geospatial cube containing a plurality of dimensions, each of the dimensions comprising a collection of planes representing essential data. Thus, the prior art of record neither renders obvious nor anticipates the combination of claimed elements in light of the specification. Dependent claims 22 – 26 and 28 – 32 are allowed at least by virtue of their dependencies from the independent claims 1 and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
